(54) LOST CARD NOTIFICATION SYSTEM

COPYRIGHT: (C)1992,JPO&Japio

PURPOSE: To reduce an acceptance cost by attaching a lost card notification system on the terminal machine of an automatic teller machine, etc., and accepting card loss notification by the operation of a customer.

CONSTITUTION: An acceptance means which accepts the input of data required for the notification of a lost card including an account number and a password number by the operation of the customer is provided at the automatic teller machine(ATM) 4. A specifying means which specifies a user based on coincidence between the account number included in the telegram of the lost card notification and the password number when the registration of lost card is performed is provided at a host computer. The customer depresses a (lost card notification) key by operating a touch panel switch 20, and inputs the account number, and inserts a passbook 16 according to the guidance display of a CRT 10. The ATM 4 communicates with the host computer, and requests the lost card notification.
